Sample colors are as accurate as modern technology can produce. Final grout color may vary due to job site conditions, tile porosity, mixing ratio, installation methods, sample colors or individual batches. Use grouts with the same lot/batch number. Different lot/batch numbers should be dry blended to obtain color uniformity. Verify appearance with a test area before installation. Some tiles or stones may be stained by colored grouts, application of a grout release may be necessary. Since SGM has no control over the installation procedure of this product, the manufacturer disclaims any and all warranties, expressed or implied, regarding color, shade and appearance of the product, at all times, at and after opening the container. Manufactures warranty is limited to replacement of product.

## Grout Color Selection Guide

**WE DELIVER THE QUALITY YOU'VE COME TO EXPECT, FROM START TO FINISH.**

SGM Security Polymer Grout colors have been developed with professional designers and industry experts to provide the best selection available to the industry. SGM offers the most popular standard and designer colors to go perfectly with today's ceramic tile, wall coverings, fabrics, fixtures, furniture and all other elements used in interior design. Each product serves a specific purpose in the installation process and is designed to give you the precise performance needed for your project.

# PERFORMANCE, VERSATILITY AND VARIETY PROVIDE A QUALITY JOB.

## Security Polymer Grout

This polymer modified Portland cement based grout is designed to be used with all tile types in joint widths from 1/8" to 5/8". Security Polymer Grout eliminates the need for liquid additives with its advanced polymer. Easy clean-up and eliminates shading. Meets ANSI A118.6.

## Dry Set (Unsanded) Polymer Modified Grout

Unsanded Dry Set Grout is used when grout joints are 1/8" or less when installing glazed bodied tiles, marble or granite. Note: Shade variations may occur due to absorbency of the tile. When grout is wet, color will appear darker. Meets ANSI A118.6.

## Quarry Grade (AR) - Commercial Portland Cement Grout

Proven blends of the highest quality graded silicas, portland cement, colorfast pigments and other special proprietary ingredients that can be used to grout quarry tile, brick pavers, or ceramic tile requiring a larger grout joint - grout joints widths from 1/8" to 1/2". Meets ANSI 118.6.

## Color Guard Grout Stain

Unique concept in grout and concrete coatings, available in 36 standard SGM colors. Sinks deeply into pores, coating the aggregate and leaving the coloring below the wearing surface. Dries to a matte finish which maintains the granular appearance of grout and provides a glare free, non-skid uniform color that is highly resistant to wear, sunlight, water and extreme temperature.

## EGS Mortar & Grout System

A water-cleanable, three component, mortar and grout system designed for setting and grouting ceramic tile and pavers over a wide variety of substrates. EGS yields exceptionally high strengths, chemical and stain resistance. Ideal for use in food service locations, laboratories & similar environments. Meets ANSI 118.3.
